Professional Summary

A skilled Web Developer with 5 years of experience at Infosys, specializing in front-end and back-end development. Proven expertise in creating robust, scalable, and user-centric web applications. Adept in HTML, CSS, JavaScript, and modern frameworks like React and Node.js. Committed to delivering high-quality solutions, improving site performance, and maintaining clean, maintainable code.

Work Experience

Senior Web Developer

Infosys Ltd. – Bangalore, India May 2019 – Present

- Led the development of responsive, user-friendly web applications for multiple clients, focusing on improving user engagement and conversion rates.
- Collaborated with cross-functional teams including designers, back-end developers, and product managers to deliver seamless user experiences.
- Developed reusable components in React.js, improving development speed by 30% for future projects.
- Integrated third-party APIs such as payment gateways and social media platforms into client websites, improving functionality and engagement.
- Utilized RESTful APIs to build dynamic, data-driven applications and implemented security best practices to safeguard user data.
- Enhanced web performance through code optimization, reducing load times by 20%.
- Worked with CI/CD pipelines using Jenkins, ensuring smooth and continuous deployment of updates.
- Mentored junior developers and provided code reviews to maintain high coding standards.

Key Projects:

- **E-commerce Web Application:** Developed an e-commerce platform for a retail client using React.js and Node.js, increasing online sales by 25%.
- **Healthcare Portal:** Created a secure healthcare portal using Angular and integrated it with a back-end API to manage patient data, improving client efficiency by 40%.
- **Internal Infosys Dashboard:** Built an internal dashboard to track employee productivity and performance, reducing reporting time by 50%.
